Specifications

Beacon

Beacons can be used independently or in conjunction with LaneLight systems.

- Available with 8 or 12 inch FUTURLED3 retrofits in red, amber, or green
- Power: 120VAC, 12VDC, 24VDC, optional solar power packages
- Masks are available in a variety of symbols including 'man walking', arrow, and bicycle

Futura Housing

Futura is the world's first traffic signal developed using eco-design principles, offering a new level of efficiency and environmental consideration. Choose Futura to contribute to the reduction of CO₂ emissions from product manufacture and energy production.

Ultra-slim design for FUTURLED lenses ensures highest energy efficiency and appealing, modern appearance with optimized strength and visibility.

- UV-stabilized polycarbonate
- Available for 8 or 12 inch FUTURLED3 retrofits
- Mounting: Vertical or horizontal; integrated frame to fix backing boards

AluStar Housing

AluStar is the latest generation of decorative signal head housing specifically designed for LED usage with 1, 2, or 3 lenses. Its modular high quality aluminum design features two-tone options in a variety of RAL colors.

- Available for 8 or 12 inch FUTURLED3 retrofits
- Mounting Brackets: Aluminum T or L design. 4, 7, or 9.5 inches

Bike Buddy

Bike Buddy is an innovative traffic solution for cyclists. The lit signal highlights a bicycle symbol, prompting traffic to recognize and accommodate cyclists in bike lanes. By including in-road design to cyclists, Bike Buddy promotes a healthier, more environmentally friendly lifestyle.

- Supplied in AluStar, Futura, or standard polycarbonate housings
- Available with 8 or 12 inch FUTURLED3 retrofits in red, amber, or green
- Power: 120VAC, 12VDC, 24VDC, optional solar power packages
