

# *SchoolSign*

## *Programmable LED Enhanced Signage*

### Superior Safety

Dual flashing LED strips set near the top and bottom increase awareness of the school zone and alert drivers to the speed limit in effect.

Universal mounting hardware allows easy and versatile setup.

The Lexan cover front is weather-proof and virtually maintenance free.

2-year warranty.

Fully daytime-visible ultra-bright amber LEDs with automatic night dimming.

120V AC or solar - powered, sized for your location to provide reliable operation.

### Advanced Technology

Serial port or wireless interface connects the display system to an external computer for scheduling up to 365 days in advance - including holidays, early dismissal times, and special events.

All functions are user-configurable. Selectable flash patterns.

Options include:

Variable SPEED LIMIT display with programmable 2 digit, 12 inch amber numerals.

Radar feedback display to alert drivers to their actual speed and provide optional datalogging.
